

Seif Desouky

MEAN Stack Developer

 Giza . Egypt  +20 1112898685  www.linkedin.com/in/seif-desouky  seifdoss6@gmail.com  [Seif Desouky](#)

OBJECTIVES

Motivated MEAN Stack developer (MongoDB, Express.js, Angular, Node.js) with hands-on experience building full-stack web applications, RESTful APIs, and responsive interfaces. Currently completing a 210-hour intensive training at NTI while pursuing a Computer Science degree. Seeking internship, part-time, or full-time opportunities in frontend, backend, or full-stack roles to deliver real-world impact and grow within a professional team.

EXPERIENCE

Trainee, Frontend Developer | NTI, Egypt | Aug – Sep 2024

- Built 7+ responsive web projects including e-commerce platforms using HTML, CSS, JavaScript, and Bootstrap.
- Developed user-friendly interfaces focused on cross-device compatibility and modern UI design principles.
- Strengthened problem-solving skills through hands-on project-based learning.

Trainee, Full-Stack Developer – MEAN Stack | NTI, Egypt | July – Sep 2025

- Completing a 210-hour intensive MEAN Stack program covering MongoDB, Express.js, Angular, and Node.js.
- Built RESTful APIs with Express.js and Node.js connected to MongoDB Atlas, following clean architecture principles.
- Developed a full-stack e-commerce application featuring product browsing, shopping cart, JWT authentication, and order management.
- Designed responsive Angular interfaces ensuring seamless UX across desktop and mobile devices.
- Applied security best practices including input validation, password hashing, and role-based access control.
- Used Git and GitHub for version control and collaborative development.

Projects

Academic Management System | MEAN Stack | [GitHub](#)

Built a full-stack academic platform using MongoDB, Express.js, Angular, and Node.js with role-based access control for students, professors, and admins. Implemented secure JWT authentication, RESTful APIs, assignment submission system, and real-time comment communication. Designed a fully responsive UI with Angular and Bootstrap, and used MongoDB Atlas for cloud data storage.

Tech Store | Angular, Bootstrap, TypeScript | [GitHub](#)

Developed the frontend of a full-featured online electronics marketplace using Angular and TypeScript. Built dynamic product browsing with advanced filtering and search, shopping cart, checkout flow, order tracking, and role-based UI for customers, sellers, and admins. Integrated with RESTful APIs and ensured full responsiveness across all devices using Bootstrap.

EDUCATION

Bachelor of Computer Science, Luxor University, Egypt

Faculty of Computers and Information, Information System Department

Graduation Year: 2026

GPA:3.07

Technical Skills

- **Languages:** JavaScript, TypeScript, HTML, CSS
- **Frontend:** Angular, Bootstrap
- **Backend:** Node.js, Express.js
- **Database:** MongoDB, MongoDB Atlas
- **Tools:** Git, GitHub, Postman, VS Code
- **Concepts:** REST APIs, JWT Authentication, RBAC, Responsive Design
